

My Daily Life Cut (하루내컷)

Working Progress and Experiencing hardness

Avengers

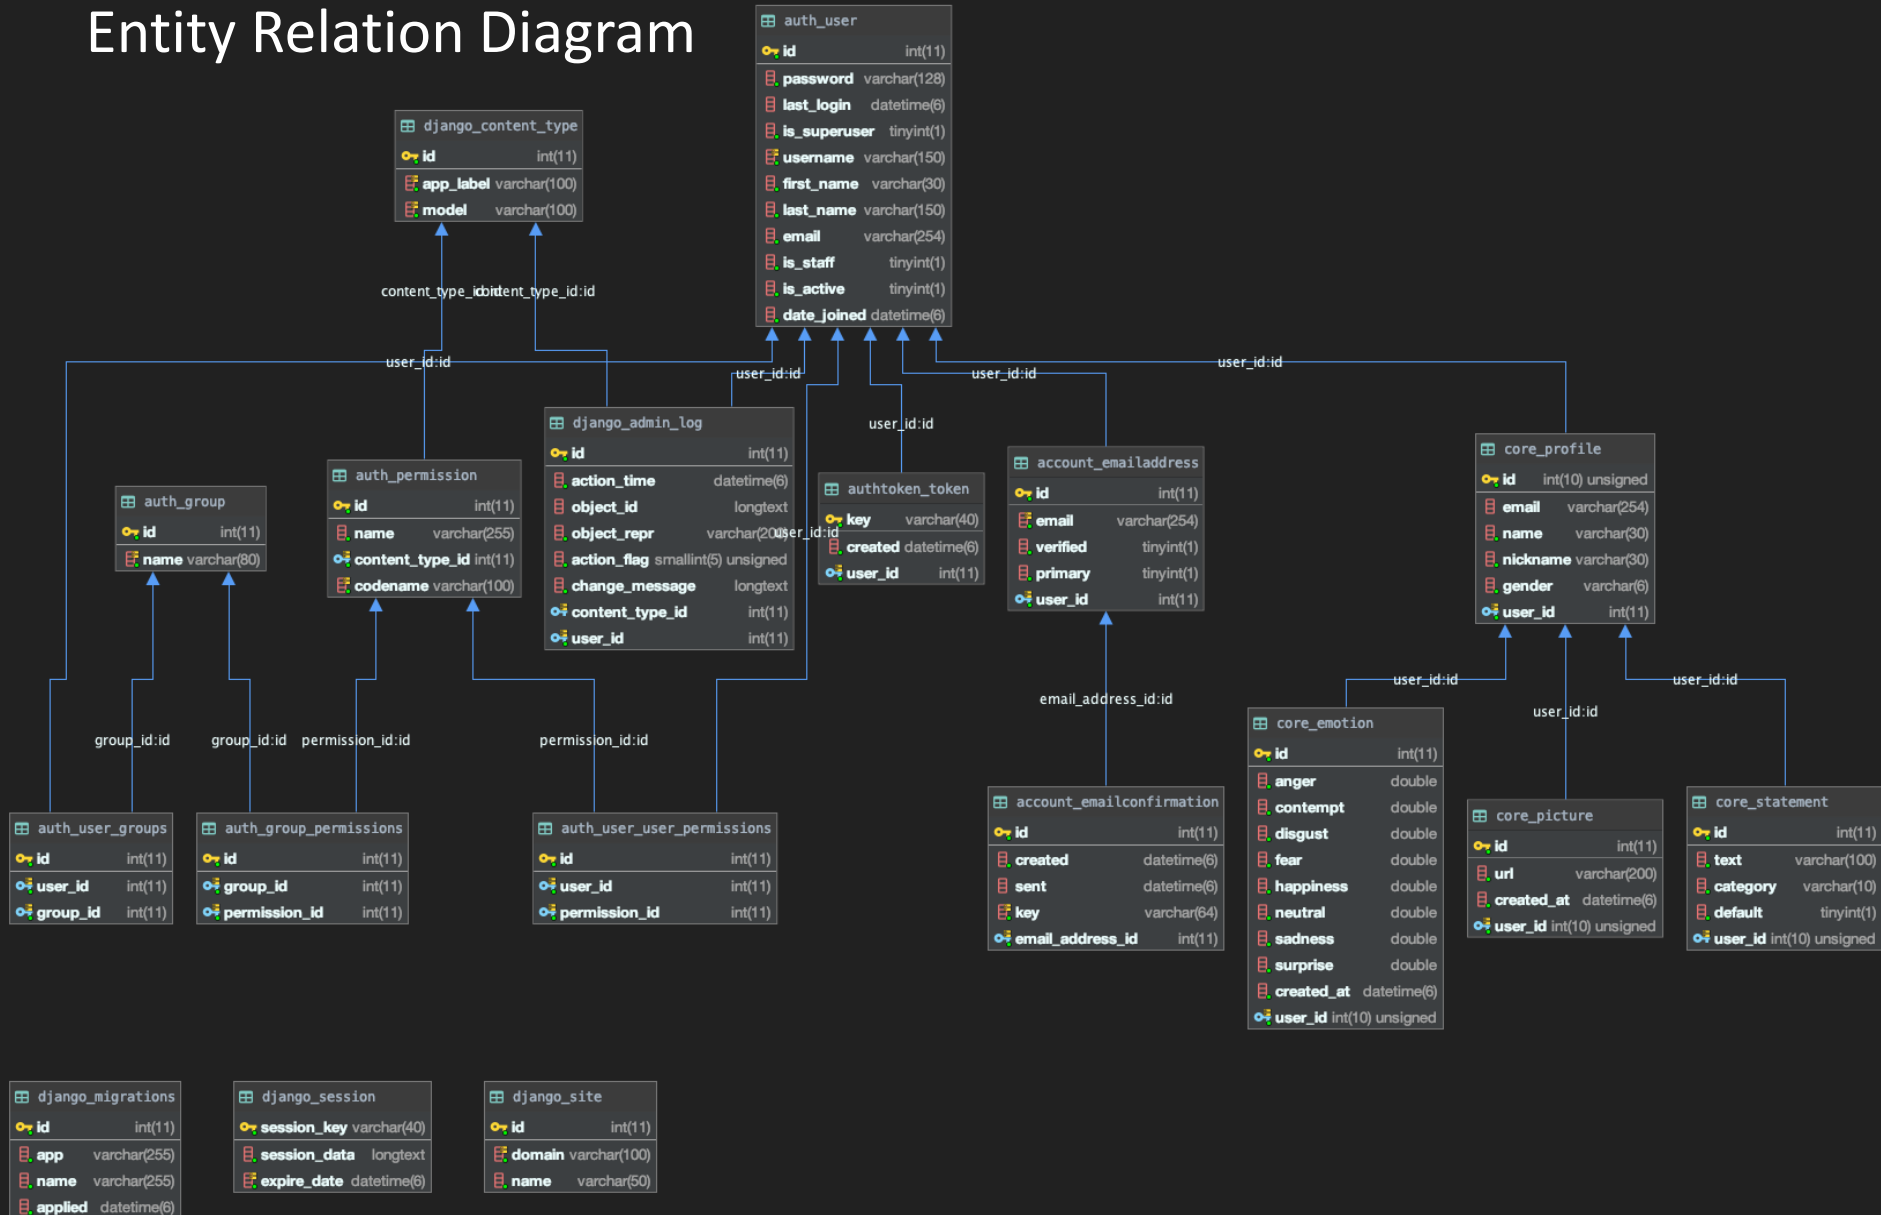

1. David, Jeon
2. Ji Won, Hur
3. Ji Yun, Park
4. Young Hoon, Lee

Development Progress

1. Backend (Django REST api server)
 1. Design Architecture
 2. Database Modeling (with ERD)
 3. Developed Models , Views, Serializers, Urls and settings
 4. Deployed to AWS cloud
 5. Developing missing parts (diary component, etc)
2. Frontend (Android Native App)
 1. Work Flow Architecture
 2. Main, Login, Camera, Archive, Introduce page developed
 3. Connected to Microsoft Azure Face API
 4. Connected to Cloudinary for saving user image
 5. Connecting Backend

Experiencing hardness (but return grow-up)

1. First experience of “team” project
 1. It requires communication more than self-project
 2. It requires co-work skills
2. Learning curve to new tools, framework, language and third party, etc.
3. Changing plans is necessary in specific situation. It makes another development and design.
4. Lack of time brings tight development and design timeline
5. ~~We are under DDD (Deadline Driven Development)~~

But we are Avengers.

We believe these hardships take avengers to higher.
